Summary

Detail-oriented and motivated Business Analyst with experience in data validation, quality checks, and workflow automation using Excel, SQL, and Python. Adept at ensuring data integrity, conducting root cause analysis, and collaborating across teams to meet business objectives. Passionate about turning raw data into actionable insights and maintaining accuracy across data processing lifecycles

Skills

- **Languages and Tools**- Python (NumPy, Pandas, Matplotlib), SQL, Tableau, Power BI, Advanced Excel, Google Sheets, Google Data Studio, Jira and Confluence, AI tools (Claude, Gemini, ChatGPT))
- **Analytics and Operation**-Data Validation, Quality Checks, Root Cause Analysis, Data Wrangling, KPI Dashboards, Requirement Gathering, Reporting, Automation, Market Research, SDLC, Project Management, Agile/Scrum Methodologies, User Acceptance Testing (UAT)
- **Soft Skills**- Attention to Detail, Problem Solving, Collaboration, Process Optimization.

Experience

Data Operations Analyst, CarDekho Group (Gurugram, India) Presently Working

- Managed and analyzed 1000+ monthly repossession cases using Advanced Excel (Pivot Tables, XLOOKUP, Power Query), SQL, and CRM/ERP systems, translating operational data into actionable business insights and maintaining 99% data accuracy for management reporting.
- Gathered, documented, and analyzed business requirements from lenders, field teams, risk, and operations stakeholders; prepared **Business Requirement Documents (BRDs)** and functional specifications in **Confluence** to support process improvement initiatives.
- Utilized **SQL** for data validation, reconciliation, and discrepancy analysis, identifying process gaps and reducing issue resolution turnaround time (TAT) by 30%, while improving SLA compliance to over 95%.
- Created and managed user stories, acceptance criteria, and requirement traceability in **JIRA**, facilitating effective collaboration between business stakeholders and technical teams throughout the project lifecycle.
- Developed dashboards, KPI reports using Power BI and Excel to support data-driven decision-making, enabling leadership to monitor operational efficiency and risk indicators effectively.
- Supported UAT planning and execution by validating business requirements against delivered solutions, documenting defects in **JIRA**, and ensuring successful implementation of process enhancements.

Education

Uttarakhand Technical University, B.Tech in Information Technology August 2021–June 2025

- GPA: 7.5/10

Arpan Public School, Intermediate April 2020–June 2021

- GPA: 9.9/10
